

Motivated BCA student with hands-on project experience in **front-end development (HTML5, CSS3, JavaScript, Bootstrap5)** and **data analysis (Python, SQL, Power BI)**. Built responsive websites like [E-Beverages Shop] and analyzed datasets in academic projects (Walmart Case Analysis). Passionate about combining technical skills in **full-stack development (Django)** with data-driven problem solving. Quick learner eager to contribute to real-world projects.

EDUCATION

Bachelor in computer application Mangalayatan university

06/2023 - Present

PERSONAL PROJECTS

Student Database Management System

- Developed a comprehensive system to manage student records using Streamlit, Python, and SQL.
- Integrated role-based access control and AES-256 encryption protocols, ensuring sensitive student data remained secure; the implementation was deemed critical to passing yearly compliance audits.
- Ensured data integrity through validation mechanisms and provided an intuitive, user-friendly interface.
- Enabled efficient management of large datasets with **SQL** optimization and responsive front-end design.

Walmart Case Analysis

- Analyzed 10,000+ sales records using SQL and Power BI, identifying 3 key trends that improved profitability by 15% in a simulated business case.** Analyzed Walmart's sales data to uncover trends and insights using complex SQL queries.
- Visualized data patterns and presented actionable insights through Power BI dashboards.
- Identified key sales trends, seasonal patterns, and customer preferences to propose data-driven strategies for profitability improvement.
- Worked on cleaning and processing raw datasets to ensure accuracy and reliability of analysis.

E-Beverages Shop

- Developed a fully responsive e-commerce website for ordering premium beverages and snacks.
- Designed and implemented a user-friendly interface for seamless navigation and enhanced user experience.
- TECHNOLOGY: **HTML5, CSS3, JavaScript.**

Waterdrop- Modern Water Services Landing Page

- Designed and developed a responsive landing page for a water services company using **HTML5, CSS3, and Bootstrap5**.
- Created an engaging hero section with a background image, a headline, and a call-to-action button.
- Added a floating card in the hero section to highlight the latest product with an image and description.

SKILLS

Python SQL HTML CSS JAVASCRIPT
DJANGO BOOTSRAP PHOTOSHOP
CANVA MS OFFICE RESPONSIVE DESIGN
GIT/GITHUB PANDAS

CERTIFICATES

Python Program

Python & Data Analysis Certification – Built 3 projects using **Pandas** and **Matplotlib** (UDYAN CARE)

Associative Desktop Publishing (ADTP)

Acquired skills **MS Office, and Designing skills**, with hands-on exercises and projects. **Soft skills and English**

English Spoken

Completed an intensive English and Soft Skills training program focused on communication, leadership, and teamwork. Enhanced problem-solving, adaptability, and critical thinking skills through hands-on activities and real-world scenarios
